ABSTRACT

MyStudyLife is a student schedule management project designed to help students balance academics, extracurricular activities, and personal commitments. It provides an intuitive platform for creating personalized schedules, tracking tasks, and optimizing time to reduce stress and improve productivity.

The goal is to assist students in managing their workload effectively while maintaining a healthy work-life balance. Key features include task tracking for monitoring deadlines, time blocking for focused study and leisure, and priority setting to manage tasks efficiently. Reminders and alerts help students stay on track, while the system's flexibility allows easy adjustments as schedules change.

In conclusion, MyStudyLife helps students stay organized, meet deadlines, and maintain a balanced lifestyle. With its user-friendly features, it fosters better time management habits, leading to improved academic performance and well-being.
